📄 Share

The set `[1, 2, 3, ..., n]` contains a total of `n!` unique permutations.

By listing and labeling all of the permutations in order, we get the following sequence for `n = 3`:

1. `"123"`
2. `"132"`
3. `"213"`
4. `"231"`
5. `"312"`
6. `"321"`

Given `n` and `k`, return the `kth` permutation sequence.

Example 1:

Input: `n = 3, k = 3`

Output: `"213"`

Example 2:

Input: `n = 4, k = 9`

Output: `"2314"`

Example 3:

Input: `n = 3, k = 1`

Output: `"123"`

$$n = 4, K = 17$$

$n = 4, K = 17$

Recursion \rightarrow $\boxed{}$ \rightarrow sort.
 $ds[K-1]$

$$n = 4, K = 17$$
